EXECUTIVE SUMMARY

Frontend Engineer with **6+ years** of experience building fintech, proptech and enterprise web applications. At AltInvest (formerly PropShare), delivered **SSO, investor onboarding, video KYC, document signing and compliance journeys** for a **SEBI-regulated SM REIT platform**. Hands-on experience with React.js, Next.js, TypeScript, Redux Toolkit and React Query, with testing in Jest, React Testing Library and Playwright. Strong in frontend performance, API request optimization and **WCAG 2.1 AA accessibility**.

CORE TECHNICAL EXPERTISE

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS/SASS, Tailwind CSS, Bootstrap 5, responsive UI

State & APIs: Redux Toolkit, React Query (TanStack Query), REST APIs, async request handling

Testing: Jest, React Testing Library, Playwright — unit, component, UI/API integration and end-to-end testing

Architecture: Reusable React components, component libraries, design systems, frontend architecture, code reviews

Performance & Accessibility: Lighthouse, Core Web Vitals, API request optimization, image optimization, WCAG 2.1 AA, ARIA, keyboard navigation, screen-reader support

Frontend Security: SSO, token lifecycle handling, session management, secure redirects

Cloud & Delivery: AWS S3, CloudFront, Docker, Vite, Git, GitHub/GitLab/Bitbucket, CI/CD collaboration, frontend release coordination, Agile/Scrum

AI-Assisted Development: Claude Code, Codex — feature development, test-case writing, PR and code reviews

Design: Figma, Balsamiq, wireframing, prototyping, usability feedback

PROFESSIONAL EXPERIENCE

AltInvest Online Platform (formerly PropShare) · Bangalore

Software Development Engineer *May 2024 – Oct 2026*

India's SEBI-regulated SM REIT investment platform

- Built and maintained investor-facing features for a **SEBI-regulated SM REIT platform serving 5,000+ registered investors** using React.js, Next.js and TypeScript, with **Redux Toolkit** for client state and **React Query** for server state, caching and submission mutations.
- Delivered the **Single Sign-On (SSO)** module, implementing secure token lifecycle handling, session expiry, protected cross-module redirects and error-recovery states.
- Owned key investor journeys including **multi-step onboarding**, profile/taxation resubmission, disclosures and payment interfaces, with conditional flows for resident and NRI investors.
- Integrated the **DigiO video-KYC SDK**, implementing asynchronous verification states, session polling and fallback handling for incomplete or failed attempts.
- Implemented **document-signing and consent-capture** experiences with signature-status tracking, confirmation states and audit-trail support.
- Developed the **compliance document upload module** using AI-assisted development with **Claude Code**, defining its component architecture and folder conventions with **reusable React components** and shared UI patterns.
- Wrote **Jest and React Testing Library** tests for components and UI/API integration, and **Playwright** end-to-end tests for SSO, onboarding, vKYC and document-signing journeys; used **Claude Code and Codex** to write test cases and support PR and code reviews.
- Optimized an API-dependent workflow from **~110 seconds to 2–3 seconds** by removing duplicate requests, parallelizing independent calls, improving payload handling and resolving asynchronous race conditions.
- Reduced large image assets from **~15–30 MB to 300–400 KB** through compression and render-size optimization, and resolved **150+ WCAG 2.1 AA accessibility issues** across critical investor journeys.

- Integrated **AWS S3** for file uploads and storage and **CloudFront** for static asset and document delivery; prepared frontend builds and coordinated releases with DevOps and backend teams.
- Built the **PropShare Titania** commercial real-estate listings experience with responsive, filterable property search.

BrandSystems India Pvt. Ltd. · Bangalore
Web Developer *Dec 2021 – Apr 2024*

- Owned frontend development of **LAM**, a multi-channel campaign-management platform, building analytics dashboards and campaign-scheduling interfaces.
- Built data visualizations for impressions, CTR and conversions; worked with backend developers on API contracts and data integration.
- Prototyped feature and module flows in **Balsamiq** to align product and stakeholders before development.
- Built **MARCOM**, a responsive market-research management tool using JavaScript and Tailwind CSS, delivering production UI from wireframes and prototypes.

SOSUDATECH Pvt. Ltd. · Noida
UI/UX Developer *Sep 2020 – Nov 2021*

- Delivered **10+ client websites** and web applications, owning frontend implementation from wireframes through production deployment.
- Built reusable UI components and design patterns, and improved maintainability through clean, modular frontend code.

PROJECTS

mohdshahrukh.in · Personal brand & frontend portfolio *Mar 2023 – Present*

- Personal site showcasing my work across **web design, frontend engineering, accessibility & compliance, and testing & QA**, with resume, project portfolio, testimonials and contact sections.
- Designed and built a **responsive, accessible UI** in HTML5, CSS3, JavaScript, Bootstrap 5 and Tailwind CSS, with automated deployment to Hostinger through a **Bitbucket CI/CD pipeline**.

sosudatech.com · Sosuda Tech corporate website *Nov 2020*

- Designed and developed the **company's corporate website** using HTML5, CSS3, JavaScript, jQuery and Bootstrap 4.5, creating UI assets in Photoshop.

CERTIFICATIONS

- **IBM Full Stack Software Developer** — IBM / Coursera (Professional Certificate)
- **React — The Complete Guide** (incl. Next.js, Redux) — Udemy

EDUCATION

B.Tech, Electronics & Communication Engineering *Graduated 2019*
Bipin Tripathi Kumaon Institute of Technology, Dwarahat
